Libraries / frameworks

Ruby-On-Rails | ExpressJS | Angular | SailsJS | Pygame | XNA | Zend | jQuery | CodeIgniter

Systems administration

- Ubuntu, Linux Mint and Windows8 user.
- Accustomed to use and manage Debian based systems: Raspbian, Ubuntu desktop and server, Debian.
- Nginx reverse proxy and / or load-balancer, Unicorn, Apache2 and Express (Node.js) web-servers.
- Oracle and SQLServer at school ; MySQL, PostgreSQL, Redis and MongoDB experienced and used in projects.
- Source code version control system: some SVN and much Git.
- Continuous integration: Jenkins, Docker, Capistrano, Ansible and Chef.

Management

- Team management: implement the environment which allows to develop the products and achieve goals.
- Used to Agile methods, especially Scrum. Pair programming and TDD practice.
- Speaker: animation and presentation about a product or a project.
- Interpersonal: listening and understanding individuals to facilitate interactions within a group.
- Marketing: around and through a product and / or company to communicate values.

Professional experience

RedShield Security Ltd

Software Developer

January 2015 – April 2016

Wellington, New Zealand

Development in Ruby and Javascript.

Configuration of production and CI servers.

Research and development.

CER SNCF

IT service

June 2012 – Oct 2014

Bordeaux, Aquitaine, France

Distributed all over the Aquitaine, France and Poitou Charentes French regions, the CER (for Committee of Regionnal Establishment) provides services to SNCF's workers.

First missions

- Web development in PHP with the Zend framework.

- Production environment management: Nginx front-end with FCGI, PostgreSQL production database.
- Team work with Git and automated deployment on top of this VCS tool.
- Adaptation of our tool for another CER: needs analysis, objectives definition, integration to our development and deployment processes and tools.

Project, subject of my master thesis

- Management of a project to build a website dedicated to SNCF's employees: tasks and planning definition, resources and skills affectations to provide this new service in six month with a two humans team.
- The application can be found at <http://cheminot.cer-sncf-bx.org> .
- Needs of integration within the existing information system: databases shared with other services, web server organization.
- Communication and product launching: define and reach targets, follow the adoption and usage of the product.
- Back-end powered with Ruby-On-Rails. Front-end development with Slim, SASS and CoffeeScript templating languages.
- Quality management by software testing using Rspec and Capybara.
- System and database administration: Ubuntu 14.04 production server, Nginx and Unicorn to serve the application, Git and Capistrano for automated deployment tasks.

Others

- Information system maintenance: Zimbra mail, Windows2008 domain, Debian web servers.
- Users assistance, IT park maintenance.
- IT service management: needs analysis and tasks definition, listing of skills and resources available to prioritize our work.
- Recruitment of IT service members: needs analysis, tasks and required skills definition. Participation in job interviews.

Cabinet P.PI/4

Web developer summer internship

Summer 2011

Bordeaux, Aquitaine, France

- Web development in PHP with the CodeIgniter framework.
- Seven students team organized with the Scrum method.
- Interviews with client for needs analysis.
